So, then, why should not some advice be given to the said lord and master? For verily there i more than one of them who make bome mighty unpleasant. Taken there in 1885, he had only thirty-four meals during the next five years, consisting of a small goat or a few rabbits. Here is a story illustrative of the tribulations of an editor of a paper in the west in the old days. Away back in the early eighties of the last century a notice appeared in a journal published at Dodge City which ran as follows: "In view of the fact that we cannot pay the road tax of \$10 assessed against us this year we have been sentenced to a certain period of confinement by the judicial authorities of this state; consequently there will be no issue of this paper for the next three weeks. But, as the state will of course have to board us, we figure that we shall come out some \$20 ahead."-Har-

The Importance of Advertising. Time was when advertising was regarded as "blowing one's own horn." and there have been in it at times fakes and frauds, just as there have been in other lines of business. All that has changed very perceptibly in the past three or four decades. Business men have realized that the world is too large to ask the people in it to hunt around and find out for themselves what the manufacturer makes and what the merchant has to sell. The possible consumer must be found and told about what is for sale and why to advertising.—Indianapolis Star.

Sick Headache

When your head aches, there is a storm in the nervous system, centering in the brain. This irritation produces pain

in the head, and the turbulent nerve current sent to the stomach causes nausea, vomiting. This is sick headache, and is dangerous, as frequent and prolonged attacks weaken the brain, resulting in loss of
